New Power Supply Product Extensions Added for Reliability and Control

Germantown, WI—February 2026— WAGO is introducing new product offerings in three of their power supply categories. Their base power supply line expansion includes 10 A, 20 A, and 40 A variations with single or three phase options. These new models provide many of the same features as the original, including compact size, wide operating temperature, and more.

Six new products are joining WAGO's extensive selection of Electronic Circuit Breakers. Our 4- and 8-channel ECBs come with a communication interface and allow a choice among IO-Link, Modbus RTU and Manchester protocol for configuration, control and monitoring.

Three New Devices in the WAGO Portfolio: Featuring Integrated Supercapacitors with an optional expansion module and a new Charger and Controller for External Lead Batteries

WAGO's Uninterruptible Power Supplies (UPS) will be adding three new devices to their portfolio, helping to bridge instabilities and keep your system running safely. These devices ensure you have the right storage form for every energy requirement.
